

**Dr. Christine Sasse**

**Member of the
Executive Board**

People | Culture | Organisation

As a member of the Executive Board of Sasse Group, Dr. Christine Sasse is responsible for People | Culture | Organisation.

A Doctor of Medicine, she joined the facilities management company founded by her husband in 1996 and dedicated her commitment to the people in this labour-intensive industry right from the start. Her focus was always on "enabling". The anchoring of personnel development in a Management Board department and the establishing of the Sasse Academy illustrate the importance that qualification and further training play in the Sasse Group. Together with her husband, she has driven the development of the Munich-based facilities service provider into an international full-service provider of total facilities management. The entrepreneurial couple have two daughters, who took over the company in the second generation at the beginning of 2022.

Christine Sasse holds various honorary posts. Among other things, she is Honorary Consul of the Republic of Armenia in Bavaria, Deputy Chairwoman of the Supervisory Board of Bayerische Gastgeber AG, a member of the Presidium of the Bavarian Economic Advisory Council and a member of several charitable organisations that promote the integration of children and young people into work and society. Since 2008, she has been a spokesperson for the "FM-die Möglichmacher" initiative, which aims to increase the visibility and recognition of the FM sector in society.
